FIRE BY DESIGN

Cubic Series Wood Fires

The Cubic series brings about a new generation of wood burning fire. Among the five models of varying sizes, some are floor models and others are directly attached on the wall.

Minimal, yet sophisticated and contemporary, the unique Cubic series were designed by the Danish architect Anders Nørgaard. He stated: *"I did not just want to make a stove, I wanted it to be something more than that"*.

Anders Nørgaard designed shelves for firewood on a model. He revived the tradition of decorating the mantel—*"On one of the long stoves part of it is for the look, and the part that does not heat up can be used for pictures or candles on the stove"*.

All the models utilize the same highly efficient, fire box and are EPA certified and UL/ULC approved. The thermal "air wash" system constantly self-cleans the clear glass fire door to keep it practically soot-free. The "cool" door handle is nearly invisible, yet it has finger-tip control for ease of opening and closing.

Higher fuel efficiency, higher combustion temperatures, and lower atmospheric emissions make burning wood a "green" thing and an environmentally responsible addition to your home.

The five versions include: Cubic 215 - 7' high; Cubic 166 - 5½' high; Cubic 109 - 3½' high; Cubic Wall; and Cubic W200 - 6½' long with side wood holder.

Technical Specifications		
Color/Material	Black or Gray Steel	
Heat output range	14-27kBTU	4-8kW
Approx. heating area	1,300ft ²	120m ²
Flue size	6"	15cm
Firebox: h/w/d	17/15/13"	42/37/33cm

Model	Venting	Weight	Dimensions h/w/d
Cubic 215	Top/Back	420lb/190kg	85/19/17" 215/48/43cm
Cubic 166	Top/Back	365lb/165kg	65/19/17" 166/48/43cm
Cubic 109	Top/Back	320lb/145kg	43/19/17" 109/48/43cm
Cubic Wall	Top/Back	220lb/100kg	28/19/18" 70/48/45cm
Cubic W200	Top/Back	400lb/180kg	30/79/17" 75/200/43cm
