Innovative and Mesmerizing

Originally designed by two German Engineers as a way to provide an efficient burning method and minimize pollution in third world countries, the xeoos® Twinfire has a life of its own as a remarkable, hand-made wood-burning product that clearly exceeds industry standards.

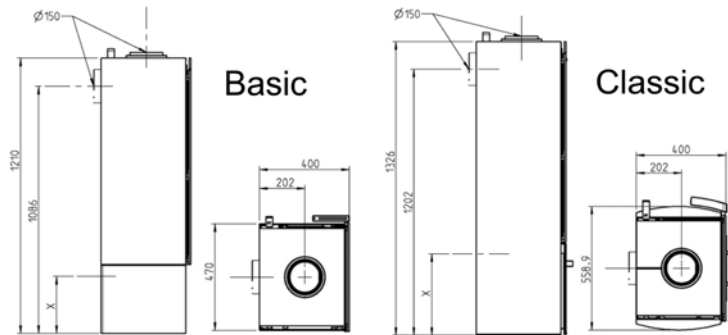

It comes in four models: Basic, Classic, Elegance, and Pur. All Twinfire models utilize the unique double-chamber combustion system for effective (93% efficient), environmentally friendly wood burning capacity and are EPA certified and approved to UL/ULC standards (tested by Omni-Test Labs—refer to logos at right).

Along with the patented burning technology of xeoos® Twinfire (see diagram below), it exhibits captivating flame patterns that dance poetically to provide an evening of visual pleasure and entertainment.

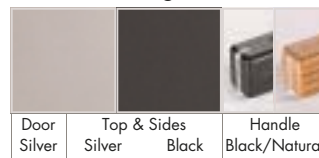

The Basic (shown on front cover) is available with a silver door, natural or black handle, steel sides/top in silver, black, stainless, or optional panels in ruby, copper, bronze. It measures 48" high, 18" wide, and 16" deep.

The impressive Classic (shown above) has a stainless steel door with lava stone cladding. Optional side panels in trachite stone. 52" high, 22" wide, 16" deep. Black glass bottom drawer.

Green and Clean

Designed with the environment in mind, the Twinfire with its unique double-chambered firebox and sleek lines is the stove of the future. Add this remarkable stove to a living space as an efficient, green alternative. Truly, it is a fascination and joy to own and operate.

The chic Elegance (shown above) is available in black glass sides with a stainless steel door, or optionally all in stainless steel, with a lava stone top plate, and with the base and handle choices in natural or dark brown wood. It measures 50" high, 19" wide, and 16" deep.

The exotic Pur (shown on back cover) with its futuristic look comes with black glass and aluminum side panels, and a choice of lava stone or black steel top plate. It measures 51" high, 19" wide, and 16" deep.

Manufactured in Germany, the xeos® Twinfire utilizes high quality materials. Special attention to details such as the thermally decoupled silicone handle, the uniquely shaped grate, and the optional lower steel gate have created an award winning product (see several of the prestigious awards below).

Elegance (E) and Pur (P) Specifications

Heat Output:			Dimensions:		
Maximum	12 kW -	41 kBTU	Height (E)	127 cm -	50 in
Peak Efficiency		93 %	Height (P)	129 cm -	51 in
Capacity - up to	100 m ² -	1076 ft ²	Width (E)	48 cm -	19 in
Emission Rate	2.4 gm/hr		Width (P)	48 cm -	19 in
Weight (E)	160 kg -	350 lb	Depth	40 cm -	16 in
Weight (P)	233 kg -	513 lb	Back Vent ht-E	115 cm -	45 in
Pipe diameter	15 cm -	6 in	Back Vent ht-P	116 cm -	46 in
Outside Air diam.	10 cm -	4 in
