Countdown to 2018, Year of the Dog

Darby shown above hard at work in the Wittus showroom.

There's a lot to be happy about at this time of the year. The holidays are fast approaching and it's time to enjoy the company of family and friends. Everyone celebrates in their own way, and Wittus is ringing in the New Year with the addition of Darby, our new office dog. We would like to wish all of our customers a warm, furry, and prosperous 2018.

Heating Your Home in the Winter

After a storm filled Fall it's time to batten down the hatches for the next round of weather uncertainty. Make sure you have all you need to survive even the most extreme situations. You'll be in good shape if you have your wood & pellet stoves cleaned, your wood pile stacked

high, and your pellet supply well stocked. See the Wittus website www.wittus.com for more home heating options.

Cook on Wood Indoors, the Domino 8

The de Manincor wood burning cook stoves are wondrous products. They have a versatile cook top that can be used as a stove-top or an open fire by removing the rings on the top plate. This method of cooking is popular in the countryside of Italy and is becoming more and more celebrated here today in indoor and outdoor kitchens. Available in two sizes the Domino 6 & 8 Maxi have an

oven below that can bake and cook meals. Sister products include the Domina, Eco, and Atmosfera cook stoves. See the entire collection on our website.

Stove News

One Stop Shopping with Style

"Contemporary Style in particular will permeate in coming years. We live in such a connected, digital society that someone can see something that's trending in New York and immediately have access to it in Kansas City".

~Bonnie J. Steves, Interior designer NYC

LUGO Contemporary Cook Stove

The New Lugo cook stove has contemporary style that will blow your mind. The big stainless-steel oven compartment can reach temperatures of up to 500°F. The primary and secondary air are controlled by a single

element with a valve that allows steam to escape from the oven when necessary. The Lugo comes with a drip tray, a positioning grill, an oven thermometer, and the ability to top or rear vent. *Lugo in sandstone shown above & oven detail shown at right.*

Double the Fire, Double the Warmth

The Wittus Twinfire is an amazing double chambered heating machine. One of the most efficient stoves in the world, it operates up to 93%. Originated by two German engineers to aid third world countries, this stove is the ultimate design. See all five models on our

website www.wittus.com under the Twinfire product listing.

Wittus' European Visit

Visiting our manufacturers is an important part of quality control for the stoves that Wittus represents. This October Niels and Alyce visited Denmark, home of Jydepejzen, creators of the Cosmo and Cubic. *Niels shown here supporting the "weighty" statue to bring our clients new and unique products!*
