**Innovative... efficient and 93% Green...**

**Great Design with the Environment in Mind**

Enhance a room with twice the fire, the double - chambered Twinfire offers beauty and efficiency combined in one stove. Originally designed by two German engineers as a pollution control device, this environmentally friendly wood burning unit has great heating output and low fuel consumption with less ash or simply put "a clean burning machine".

The Twinfire's chic elegance and worldly practicality, puts this award winning stove in a category of its own. Four Twinfire style options are available. The Basic measures 48" high, 18" wide, and 16" deep. The Classic is 52" high, 22" wide and 16" deep. The Elegance is 50" high, 19" wide, and 16" deep, and the Pur measures 51" high, 19" wide, and 16" deep. There are multiple options for each stove's side panels, handles and base, which allow the designer to create a signature piece unique to each home.

In addition to its visual appeal, all Twinfire models utilize the unmatched patented combustion system for 93% efficient wood burning capacity and are EPA certified and approved to UL/ULC standards. Supported by NYSERDA (NY State Energy Research and Development Association), the Twinfire takes a giant environmentally friendly step towards the future of wood burning stoves.
