**Meet Outdoor Style**

A beautiful outdoor product that serves many purposes. As art, the Firebird grill stands strong in an outdoor setting, as a cooking tool it stands out as spectacular. Designed by Denmark's acclaimed architect and industrial designer Bent Falk, the Firebird takes its place as a grill with exemplary signature style.

Constructed of Corten steel, a durable material that naturally oxidizes into a patina of dark brown and rust colors compatible with the colors of nature. Grill features include an adjustable grill rack made of heavy weight solid stainless steel that is 5mm thick. The innovative rack design includes handles that stay cool and a built in warming or frying surface toward the back where you can simmer sauces or sauté vegetables. The cylindrical shaped Firebird measures: 38" h x 24" w x 20" d.

The tall Firebird chimney creates a strong draft that allows you to build faster fires, and then "funnels" the smoke up and away from the chef and nearby guests. It is easily secured in the ground by removable stakes that hold the grill in place on a lawn or beachfront location. And an added benefit is lighting a roaring fire in the wintertime and creating a warm gathering place for friends and family.
