Go Green in Smart Style...

Go Toba, Go Toba

A contemporary heating machine designed with form and functionality in mind, the Toba pellet stove's clean, simplistic lines are based on style and technique. Imported by Wittus and conceptualized by MCZ in collaboration with EMO, a market focused Italian design firm.

The award winning Toba is truly a new way of thinking. This pellet stove is not just a fireplace but a piece of fine furniture. A distinguished face in elegant colors and a solid, rectangular body separates the Toba from other pellet products. Composed of durable quality materials, the top and base are black cast aluminum with black steel sides and a cast iron door. The front panels are available with a choice of red, white, black or Bordeaux handmade ceramic tiles or soapstone. Fashion colors and high end materials are key factors for good product design. Essentially, the Toba has it all!

A distinct feature includes Comfort Air® technology, which extracts the heat produced by the stove with unequalled efficiency (over 90%). The smart digital remote control with thermostat and timer is pre-set with a multitude of programs and adjustable for easy operation. A self-cleaning firebox lined with white refractory Alutec conducts the heat for maximum efficiency, and a durable cast iron door and burn pot retains the heat further. The "smart", eco-friendly Toba is today's fashionable workhorse and an important interior design element that easily adapts to a variety of decorating scenarios.
