Lugo Cookstove

A contemporary fireplace and an efficient oven designed with the taste of good food in mind, Lugo - the wood-fired cookstove is perfect for both heating and baking. This fine product is designed by Vlastislav Vyborny from Romotop in the Czech Republic. The sleek design of the stove is synonymous with fine products. The Lugo utilizes advanced technology and brings the art of cooking on a wood fire into the 21st century.

The natural taste of food cooked on a fire is like no other. The big stainless steel oven compartment can reach temperatures of up to 500°F. The thermometer in the oven compartment makes cooking food to perfection so simple. The primary and secondary air are controlled by a single element with a special valve that allows steam to escape from the oven when necessary. The Lugo comes with a drip tray, a positioning grill, an oven thermometer, and the ability to top or rear vent. The door can be locked in the open position. The ventilated designer handle permits use when the stove is lit. And as an added feature, there is a drawer for storage at the base of the stove.

Well-constructed with good cooking in mind, the Lugo body is made of high-grade steel in a black finish. The cladding is available in natural stone or a variety of tile colors (shown at right), or in black steel (shown on the opposite page).

Tested to Washington State fireplace environmental standards, and approved to UL 1482 standards in the United States and ULC S627 in Canada, the Lugo is highly efficient (82%) and clean-burning.

Technical Specifications		
Heat output range	10-27kBTU	3-7.8kW
Approx. heating area	1,100ft ²	100m ²
Flue size	6"	15cm
Weight	331-430lb	150-195kg
Dimensions: h/w/d	61/22/18"	155/55/46cm
Firebox: h/w/d	15/13/12"	38/34/31cm
Oven glass: h/w	12/13"	32/34cm
