

WITTUS[®]

FIRE BY DESIGN

Wittus Newsletter

January /February 2019

And the Winner is...

WITTUS and the E-stove! Let the fires burn brightly in 2019. Wittus starts the new year on top with some exciting news! The award-winning E-stove, designed and engineered by DBFZ and manufactured by

Thermoelect in Germany produces both heat and electricity from burning wood. The Wood Stove Design Challenge in Washington D.C. in November brought us First Place for the automated stove category and First Place for thermoelectric stoves, with the highest and most consistent electric output of 360 watts. See full coverage at www.forgreenheat.org. Team Wittus and show partners shown above.

How to Light a Wood Burning Stove

Every stove is unique and there is a method to lighting a wood burning stove. If you follow these handy tips you should be well on your way to become a true fire-master!

- 1) Gather newspaper, kindling and well-seasoned wood.
- 2) Make 3 loose newspaper balls and set them inside the firebox. It helps to place a fire starter*inside the paper ball. Wittus QuickFire fire starters shown above.
- 3) Build a kindling teepee over the paper.
- 4) If it is a very cold day, hold a newspaper torch of light up inside the chimney opening area to preheat.
- 5) Light the newspaper balls and keep the door open a crack until the kindling is well light.
- 6) Once fire is burning add a larger log.
- 7) Keep the door cracked for as long as it takes to get the log burning fully. *Note: Shutting the door too soon will extinguish the fire.*

Product Ordering Check List

Making a check list may be your most valuable tool when it comes to ordering Wittus products. Each product has a different process for ordering, some more detailed than others. The Stack stoves are custom order. They have their own color chart and two different finishes with a choice of various heights and base options. The Shaker stove has a left or right side door option and a short or long bench. These are just a few, so it's best to call ahead and talk to a staff member with questions at 914-764-5679 or e-mail wittusreply@msn.com.

Stove News

One Stop Shopping with Style

"If you want architects to select your product for their projects, then you need to prove to them that your products are going to work. And you do that by showing them how your products have worked in projects just like theirs before".

~The Definitive Guide, Venveo

Stack Stove

Design and style mix when you see a Stack stove which is based on the concept of modular components that incorporate sections that are stacked. These stoves are hand made in Italy by La Castellamonte, a company

known for a tradition of ceramic making. Available in two sizes and 4 base options, the Stack stove is a true masterpiece. See our website for product details.

Shaker Stove

"Stove to the Stars", the Shaker is at the top of its class when it comes to the finest hearth products Wittus has to offer. This stove is available in two distinct models: Shaker short or long bench, with right or left side door opening options. The Shaker is an extraordinary stove conceptualized by Antonio

Citterio, renowned Italian industrial designer. All models utilize a highly efficient firebox and operate on an optional burn rate system that produces both minimal emissions and a visually striking fire. The Shaker stove is EPA certified and approved to UL / ULC standards.

Welcome New Dealer Fair, D&D NYC

We are all so excited, the Wittus Shaker stove will be displayed in the FAIR showroom in the Design and Decorator Building (D&D) in NYC. We extend a warm welcome to FAIR from the Wittus family. See

their website www.fair-design.com for more details on who they are and browse their beautiful new showroom.
