Star & MiniStar Pillars

The Star and MiniStar pillars are the perfect accent for garden pathways and patios. Also made of durable Cor-ten steel and topped with stainless steel fuel wells that conceal the gel can, these beautiful lighting accents are perfect for every outdoor space. Each pillar burns 2-3 hours per filling. The fuel is odorless, clean-burning, and produces lovely, lofty flames. Star pillar measures 5' tall and MiniStar measures 3.5' tall.

Phoenix Grill

The Wittus Phoenix grill is the perfect addition to an open outdoor area that longs for a functional sculptural element. Designed by Bent Falk of Denmark and made in the USA, the body is made of Cor-ten steel which is known for its long-life durability and the natural patina that it takes on over time when exposed to the outdoor elements. The tall conical shape of the Phoenix grill forms a chimney that creates a natural draft that allows you to build fires faster and directs the smoke away from the cooking area. Grill dimensions: 6'3"h X 24"w X 20"d.

Firebird Grill

The Wittus Firebird grill, designed by Bent Falk of Denmark and made in the USA is perfect for spaces that want a cylindrical outdoor grill. Made of durable Cor-ten steel and measuring 4'3"h X 19"w X 19"d, the Firebird's innovative curved design directs the smoke up and away from the chef. Comes with an adjustable grill rack with stay-cool handles that has a built-in warming and frying surface in back. This grill can also be used as a fire pit when cooler weather rolls around.
