

**FOR IMMEDIATE RELEASE**

**An Efficient Open-Hearth Heating Solution ...**

**With Quality and Stylish Design**

Made in Germany from the finest materials, the Spartherm Masonry Inserts are well designed and will easily convert an open hearth into a home heating machine. These fine fireplace inserts meet the needs of the American market and are the perfect energy and money saving solution. A step in the right direction, this radiant and natural convection heat source is something that is not possible to achieve with a standard open hearth. The addition of a masonry insert quickly creates a focal gathering place for family and friends.

Available in two sizes: the 600 (23" w x 21" h x 16" d) and 700 (27" w x 23" h x 17" d). Features include an air control adjustment, a large full-size firebox that fits a log size of 18" maximum. There are also matching steel trim kits available in a variety of sizes. Chimney size is 6"-7" and UL 103-HT or ULC S-629 approved. These products meet the 2020 EPA emissions standards and are safety tested to meet UL 1482 and ULC S-627 standards.

A contemporary, well designed insert, the 600 & 700 series is forthcoming and can be easily installed to fit most existing open hearths. Radiating high heat output, the 600 Insert model achieves 10,500 -47,000 BTU's and the 700 Insert achieves 13,500-49,000 BTU's. More heating power for the punch, the Spartherm inserts are the way to go for a warmer in-home experience.
